### 3 Year Guarantee

Every Thermostat is covered by a 3 year manufacturer guarantee straight out of the box. This covers against material defects and workmanship in normal use for a period of three years from the date of the original purchase from an authorised distributor. During this period, Thermogroup AU will repair or replace with a new or equivalent quality model at Thermogroup AU's discretion, any product proven defective in normal use. For further information contact our customer support team on 1300 368 631.

### Thermostat location

The thermostat should be located within the room to be heated, subject to current electrical regulations relating to bathrooms and wet areas. As the thermostat is floor sensing it can be installed out-side the room or in a cupboard if necessary. For easy operation and access to controls choose a location about 1.3m above the floor. Should a remote location for the thermostat be necessary the system wiring can be extended up to 50m from the installation.
