

Ablaze Magnifying Mirror

RM1403M Magnetic Mirror & RM1403C Clip On Mirror

Installation Guide

RM1403M Magnetic Magnifying Mirror

Please ensure you have read and fully understood this guide before installation

3X Magnification 140mm Round Cosmetic Mirror that will attach to the front of the mirror.

The magnifying mirror attaches to the front of the mirror using a magnetic panel that is fixed on the back of the mirror. The magnifying mirror is placed on the front of the mirror in line with the magnetic panel on the back of the mirror. This is suitable for all the Ablaze Backlit, Frameless and Framed Mirrors.

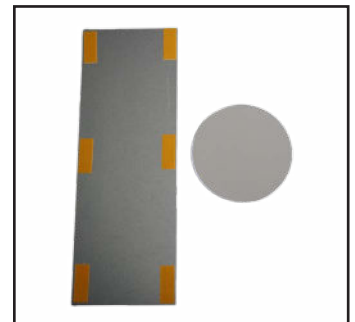

The magnetic magnifying mirror can also be used on any mirror of 4-5mm thickness. Please note the magnetic magnifying mirror cannot be used on a mirror cabinet door or any other mirror that has a MDF or other backing.

Parts Included

1 x 3X Magnification 140mm Round Cosmetic Mirror

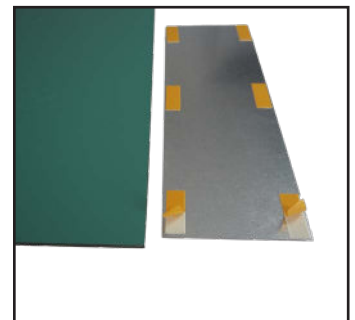

1 x Metal Panel 140x400mm

The metal panel is 140x400mm and is attached to the back of the mirror. If there is not space for the entire panel this can be cut down (using tin snips or a saw with a metal blade) but you will need to be aware of this when moving the magnifying mirror. Also consider the position of the hangers to ensure that the metal panel can fit in a location that will be suitable for the magnifying mirror.

Installation

Step 1. Choose the position on the front of the mirror where the magnetic mirror is to be located. It is recommended to hang the mirror first to determine a suitable location.

Step 2. Remove the protection from the strips of double-sided tape and place the panel on the back of the mirror in the chosen position.

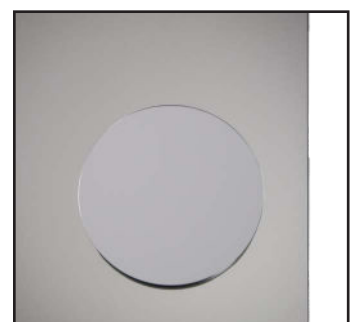

Step 3. Press the panel down firmly to ensure that it is fully adhered to the mirror. The panel can be placed over a demister pad but not over any wires and should be 10mm clear of any wiring connectors or switches.

Step 4. Once the mirror has been installed the magnifying mirror can now be magnetised to the front of the mirror in-line of where the metal panel is installed.

Please Note: The magnetic mirror can be damaged when in contact with magnetic fields: magnetic cards, Electronic devices, Pacemaker, etc. Neodymium magnets are not suitable for children. Keep out of their reach. Do not play, do not swallow, do not inhale.

It is important to note if you are moving the magnifying mirror that this is only moved to an area where the metal panel is installed.

RM1403C Clip On Magnifying Mirror

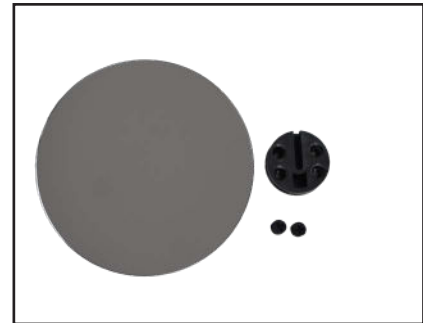

3X Magnification 140mm Round Cosmetic Mirror that clips on the side of a regular mirror.

The magnifying mirror clips on to the side of the mirror with a support bracket. The support bracket is fixed to the side of the mirror with two self-locking screws.

This is suitable for all the Ablaze Backlit Mirrors and Ablaze Frameless Hanger Mount Mirrors. This is not suitable for Ablaze Frameless Glue-to-wall mirrors or Framed Mirrors. The clip-on Magnifying Mirror can also be used on any mirror of 4-5mm thickness.

Parts Included

- Clip-on Magnification Mirror
- Support Bracket
- Self-locking screws

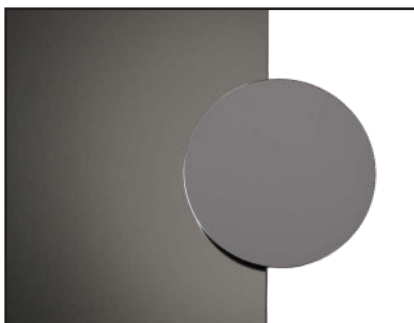

Installation

To install the magnifying mirror first fix the support bracket to the side of the mirror with the supplied self-locking screws, ensuring that the slot is facing upwards as per diagrams below.

Once the bracket is in place slide the magnifying mirror into the support bracket.

This bracket can also be used to install a magnifying mirror to the inside of a cabinet by screwing through the front of the four holes of the support bracket.

Warranty Information

Thermogroup covers all its products with a satisfaction guarantee. In addition, Thermogroup will supply a replacement product where a fault is shown to be caused by manufacture, materials or workmanship providing the goods have been installed correctly and according to installation instructions. This guarantee does not include removal, freight or installation costs.

The Magnetic Magnifying Mirrors have a 1 year warranty. To use the warranty, repair or service the customer must provide purchase invoice/receipt.

If the product develops a fault within the warranty period due to normal wear and tear, Thermogroup at its discretion will recognise whether it's a faulty product or not. If it is impossible or not economical for the manufacturer to repair the product, the manufacturer will replace the faulty product with a new unit of the same model or if there is no stock available of the same model as the product, the manufacturer will replace the product with a new unit of a similar size. No responsibility can be taken for altered dimensions and lining up of existing holes.

The repair service offered within the warranty period only covers the faults and problems as developed from the manufacturer's errors. Any damage caused by improper use or carelessness or incorrect wiring is not covered.

Thermogroup is not responsible for any monetary loss or injuries caused by improper use of this product.

Our goods and services come with guarantees that cannot be excluded under the Australian Consumer Law. For major failures with the service, you are entitled: to cancel your service contract with us; and to a refund for the unused portion, or to compensation for its reduced value.

You are also entitled to choose a refund or replacement for major failures with goods. If a failure with the goods or a service does not amount to a major failure, you are entitled to have the failure rectified in a reasonable time. If this is not done you are entitled to a refund for the goods and to cancel the contract for the service and obtain a refund of any unused portion. You are also entitled to be compensated for any other reasonably foreseeable loss or damage from a failure in the goods or service.

Care & Maintenance

For best results clean mirror with methylated spirits and water at a rate of 30% methylated spirits to 70% water. Do not use Windex or similar cleaning products. Avoid getting water on the sides or back of the mirror as damage to the silver backing can occur. In coastal areas it is recommend
